IEDR in action

A day in the life of an IEDR user once the IEDR platform is live

Access

Approved users log in to the IEDR platform using organization-specific credentials

Explore

Navigate around the IEDR platform to view dashboards and datasets that are relevant to the user's organization

Analyze

Draw strategic insights from IEDR dashboards, run queries on datasets, and analyze data (e.g., system, usage, customer, tariffs, etc.) to achieve organizational objectives.

Identify

Request consent from customers to get access to their individualized information (e.g., energy usage, billing rates), and view customer information after consent to identify tailored offers that can help customers and the organization achieve their goals

Transform!

Enhance the organization's business model, products, and services to act upon the insights and information provided by the IEDR platform, and enable NY State to achieve its CLCPA and REV goals
